Requirement on the Soviet Tractor Industry

Forwarded herewith is a guidance requirement on the Soviet tractor industry. It is believed that some of the information desired can be obtained from observations of legal travelers and interrogation of repatriates. Some of the plant information and such items of general information as existing and planned automation will probably appear in future utterances of the Soviet press and radio. Collection of this information, except for that requested on the Dnepropetrovsk plant, does not justify the use of clandestine assets.
